

Nebraska Sustainable Agriculture Society

c/o Executive Director

William A. Powers

414 County Road 15

Ceresco, NE. 68017

About:

From Aurora to Grand Island and Nebraska City to Columbus, the conference has laid the framework for promoting sustainable agriculture and local foods in Nebraska and the Midwest. The Healthy Farms Conference features over 20 breakout sessions aimed at equipping farmers, aspiring farmers, foodies, and advocates to with the skills and knowledge they need to be successful. The conference also features several keynote sessions meant to inspire and motivate people to action, and that what they are doing and why they are doing it makes a difference.

The conference also provides support for current farmers by fostering growth and stability in sustainable farming methods, including organic agriculture and sustainable agriculture. We do this by helping farmers to develop innovative ideas and projects that can impact their local communities and areas.

A variety of interactive educational opportunities are available for adults and youth. Participants will have the chance to network with farmers, university faculty, and fellow agricultural colleagues. Besides providing informative, educational sessions the conferences has commercial and educational exhibits. The Nebraska Sustainable Agriculture Society has been hosting the Healthy Farms Conference for over 40 years.

Together we can change the world one farmer, one eater at a time!
